Arthropod-borne viral fevers and viral hemorrhagic fevers (A90-A99)

A92 Other mosquito-borne viral fevers

Add A92.5 Zika virus disease
Add Zika virus fever
Add Zika virus infection
Add Zika NOS

Viral hepatitis (B15-B19)

B17 Other acute viral hepatitis

B17.9 Acute viral hepatitis, unspecified
Add Acute infectious hepatitis NOS

B18 Chronic viral hepatitis

Add Includes: Carrier of viral hepatitis

B18.1 Chronic viral hepatitis B without delta-agent
Add Carrier of viral hepatitis B

B18.2 Chronic viral hepatitis C
Add Carrier of viral hepatitis C

B18.8 Other chronic viral hepatitis
Add Carrier of other viral hepatitis

B18.9 Chronic viral hepatitis, unspecified
Add Carrier of unspecified viral hepatitis

Chapter 16

Certain conditions originating in the perinatal period (P00-P96)

Newborn affected by maternal factors and by complications of pregnancy, labor, and delivery (P00-P04)

Note:

These codes are for use when the listed maternal conditions are specified as the cause of confirmed morbidity or potential morbidity which have their origin in the perinatal period (before birth through the first 28 days after birth). Codes from these categories are also for use for newborns who are suspected of having an abnormal condition resulting from exposure from the mother or the birth process, but without signs or symptoms, and, which after examination and observation, is found not to exist. These codes may be used even if treatment is begun for a suspected condition that is ruled out.

Transport accidents (V00-V99)

Note: This section is structured in 12 groups. Those relating to land transport accidents (V01-V89) reflect the victim's mode of transport and are subdivided to identify the victim's 'counterpart' or the type of event. The vehicle of which the injured person is an occupant is identified in the first two characters since it is seen as the most important factor to identify for prevention purposes. A transport accident is one in which the vehicle involved must be moving or running or in use for transport purposes at the time of the accident.

Note:

Definitions of transport vehicles:

(a) A transport accident is any accident involving a device designed primarily for, or used at the time primarily for, conveying persons or good from one place to another.

(b) A public highway [trafficway] or street is the entire width between property lines (or other boundary lines) of land open to the public as a matter of right or custom for purposes of moving persons or property from one place to another. A roadway is that part of the public highway designed, improved and customarily used for vehicular traffic.

(c) A traffic accident is any vehicle accident occurring on the public highway [i.e. originating on, terminating on, or involving a vehicle partially on the highway]. A vehicle accident is assumed to have occurred on the public highway unless another place is specified, except in the case of accidents involving only off-road motor vehicles, which are classified as nontraffic accidents unless the contrary is stated.

(d) A nontraffic accident is any vehicle accident that occurs entirely in any place other than a public highway.

(e) A pedestrian is any person involved in an accident who was not at the time of the accident riding in or on a motor vehicle, railway train, streetcar or animal-drawn or other vehicle, or on a pedal cycle or animal. This includes, a person changing a tire or working on a parked car. It also includes the use of a pedestrian conveyance such as a baby carriage, ice-skates, roller skates, a skateboard, nonmotorized or motorized wheelchair, motorized mobility scooter, or nonmotorized scooter.

(f) A driver is an occupant of a transport vehicle who is operating or intending to operate it.

(g) A passenger is any occupant of a transport vehicle other than the driver, except a person traveling on the outside of the vehicle.

(h) A person on the outside of a vehicle is any person being transported by a vehicle but not occupying the space normally reserved for the driver or passengers, or the space intended for the transport of property. This includes the body, bumper, fender, roof, running board or step of a vehicle.

(i) A pedal cycle is any land transport vehicle operated solely by nonmotorized pedals including a bicycle or tricycle.

(j) A pedal cyclist is any person riding a pedal cycle or in a sidecar or trailer attached to a pedal cycle.

(k) A motorcycle is a two-wheeled motor vehicle with one or two riding saddles and sometimes with a third wheel for the support of a sidecar. The sidecar is considered part of the motorcycle.

(l) A motorcycle rider is any person riding a motorcycle or in a sidecar or trailer attached to the motorcycle.

(m) A three-wheeled motor vehicle is a motorized tricycle designed primarily for on-road use. This includes a motor-driven tricycle, a motorized rickshaw, or a three-wheeled motor car.

(n) A car [automobile] is a four-wheeled motor vehicle designed primarily for carrying up to 7 persons. A trailer being towed by the car is considered part of the car.

(o) A pick-up truck or van is a four or six-wheeled motor vehicle designed for carrying passengers as well as property or cargo weighing less than the local limit for classification as a heavy goods vehicle, and not requiring a special driver's license. This includes a minivan and a sport-utility vehicle (SUV).

(p) A heavy transport vehicle is a motor vehicle designed primarily for carrying property, meeting local criteria for classification as a heavy goods vehicle in terms of weight and requiring a special driver's
Definitions of transport vehicles:

(q) A bus (coach) is a motor vehicle designed or adapted primarily for carrying more than 10 passengers, and requiring a special driver's license.

(r) A railway train or railway vehicle is any device, with or without freight or passenger cars couple to it, designed for traffic on a railway track. This includes subterranean (subways) or elevated trains.

(s) A streetcar, is a device designed and used primarily for transporting passengers within a municipality, running on rails, usually subject to normal traffic control signals, and operated principally on a right-of-way that forms part of the roadway. This includes a tram or trolley that runs on rails. A trailer being towed by a streetcar is considered part of the streetcar.

(t) A special vehicle mainly used on industrial premises is a motor vehicle designed primarily for use within the buildings and premises of industrial or commercial establishments. This includes battery-powered trucks, forklifts, coal-cars in a coal mine, logging cars and trucks used in mines or quarries.

(u) A special vehicle mainly used in agriculture is a motor vehicle designed specifically for use in farming and agriculture (horticulture), to work the land, tend and harvest crops and transport materials on the farm. This includes harvesters, farm machinery and tractor and trailers.

(v) A special construction vehicle is a motor vehicle designed specifically for use on construction and demolition sites. This includes bulldozers, diggers, earth levellers, dump trucks, backhoes, front-end loaders, pavers, and mechanical shovels.

(w) A special all-terrain vehicle is a motor vehicle of special design to enable it to negotiate over rough or soft terrain, snow or sand. This includes snowmobiles, All-terrain vehicles (ATV), and dune buggies. It does not include passenger vehicle designated as Sport Utility Vehicles. (SUV)

(x) A watercraft is any device designed for transporting passengers or goods on water. This includes motor or sail boats, ships, and hovercraft.

(y) An aircraft is any device for transporting passengers or goods in the air. This includes hot-air balloons, gliders, helicopters and airplanes.

(z) A military vehicle is any motorized vehicle operating on a public roadway owned by the military and being operated by a member of the military.

No Change  Note:
Definitions related to transport accidents:

(a) A transport accident is any accident involving a device designed primarily for, or used at the time primarily for, conveying persons or goods from one place to another.

(e) A pedestrian is any person involved in an accident who was not at the time of the accident riding in or on a motor vehicle, railway train, streetcar or animal-drawn or other vehicle, or on a pedal cycle or animal. This includes, a person changing a tire or working on a parked car. It also includes the use of a pedestrian conveyance such as a baby carriage, ice-skates, roller skates, a skateboard, nonmotorized or motorized wheelchair, motorized mobility scooter, or nonmotorized scooter.

Factors influencing health status and contact with health services (Z00-Z99)

This chapter contains the following blocks:

Delete Z20-Z28 Persons with potential health hazards related to communicable diseases
Add Z19 Hormone sensitivity malignancy status
Add Z20-Z29 Persons with potential health hazards related to communicable diseases

Persons encountering health services for examinations (Z00-Z13)

Z01 Encounter for other special examination without complaint, suspected or reported diagnosis

Z01.4 Encounter for gynecological examination

Z01.41 Encounter for routine gynecological examination

Z01.411 Encounter for gynecological examination (general) (routine) with abnormal findings

Use Additional code to identify abnormal findings

Z01.419 Encounter for gynecological examination (general) (routine) without abnormal findings

Use Additional code to identify abnormal findings

Z05 Encounter for observation and evaluation of newborn for suspected diseases and conditions ruled out

This category is to be used for newborns, within the neonatal period (the first 28 days of life), who are suspected of having an abnormal condition unrelated to exposure from the mother or the birth process, but without signs or symptoms, and which, after examination and observation, is ruled out.

Excludes2: newborn observation for suspected condition, related to exposure from the mother or birth process (P00-P04)

Z05.0 Observation and evaluation of newborn for suspected cardiac condition ruled out

Z05.1 Observation and evaluation of newborn for suspected infectious condition ruled out

Z05.2 Observation and evaluation of newborn for suspected neurological condition ruled out

Z05.3 Observation and evaluation of newborn for suspected respiratory condition ruled out

Z05.4 Observation and evaluation of newborn for suspected genetic, metabolic or immunologic condition ruled out

Z05.41 Observation and evaluation of newborn for suspected genetic condition ruled out

Z05.42 Observation and evaluation of newborn for suspected metabolic condition ruled out

Z05.43 Observation and evaluation of newborn for suspected immunologic condition ruled out

Z05.5 Observation and evaluation of newborn for suspected gastrointestinal condition ruled out

Z05.6 Observation and evaluation of newborn for suspected genitourinary condition ruled out

Z05.7 Observation and evaluation of newborn for suspected skin, subcutaneous, musculoskeletal and connective tissue condition ruled out
